***Allowable Subject Matter***

1. Claims 1-55 contain allowable subject matter over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to an apparatus for allowing several viewers to assign content codes to scenes of a program. The independent claims identify the feature of "the content selector having several viewer inputs for generating respective individual content codes for a scene; the memory for storing content codes associated with respective scenes and control circuit adapted to generate a final control code for the respective scenes in accordance with the individual content codes". The closest prior art, Hancock et al discloses a conventional apparatus for programmable blocking of television and other viewable programming such as for parental control of a television receiver, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tanaka discloses a selective information playback from recording medium based on user input content codes.

Sullivan et al discloses a content control system.

Hancock et al discloses a conventional apparatus for programmable blocking of television and other viewable programming such as for parental control of a television receiver.
